WORK EXPERIENCE:

Full stack developer of a published mobile app (SportsAgenda)   *June-October 2019*

- Designed and developed the user interface utilizing the **React Native** framework.
- Structured the **Firebase** database, and handled data using Firebase Functions.

Backend developer of a delivery service web-application (ItosGo)   *May-July 2020*

- Built and implemented new functions to an unfinished **REST API** using **ExpressJS** framework. Also contributed to debugging previous versions of the API.
- Handled backend data with the No-SQL database **Mongo**.
- Fully implemented an automatized mail system using **Nodemailer.**

Full stack developer of a college community web-application   *Feb-Apr 2020*

- Used **React** to build the user interface, **Express** to handle APIs, and **Firebase** to manage data.
- In charge of planning and coding a basic social network with login requirements.

Software Development startup co-founder (Devsoc)   *June 2019-Present*

- Directly involved in team-management, full-stack development, and external relations to bring new projects to our business.
- All previously mentioned projects were made and completed as a team with my co-workers under the name of our startup company.

EDUCATION:

Tecnológico de Monterrey (ITESM), Monterrey, México   *August 2019 - Present*

- Pursuing a Bachelor of Science in **Computer Science** (2nd year)
- Expected graduation date between July and June 2023
- Current **GPA average of 3.9**

VOLUNTEERING AND LEADERSHIP:

- Staff member and mentor in a program aimed to educate and help lower class children in 2018.
- In 2018 elected as vice-president in my school, in which I managed external relations and team management. I calendarized volunteer events and assisted most of them.

SKILLS:

- Proficient in **C++, Firebase, Mongo, Express, JavaScript**
- Experience with **HTML, CSS, SQL, MATLAB, R, Python, Java, React, Node**
- Comfortable using **PowerBi, GitHub, Excel**
- Fluent in **English** and **Spanish**, **French** (certified B1).
